

ARCTIC AND ANTARCTIC ENVIRONMENT CREATED ALLOWING SPORTS SIMULATOR ENTERTAINMENT INSIDE POLAR REGION

Sports fans can now enjoy playing their favourite sports within an amazing habitat, that has been inspired by the incredible beauty of the northern and southern arctic regions. Snow creates an enjoyably realistic daytime challenge, whilst the night-time challenges feature the beauty of the Northern Lights. There are 30+ sports playable and 600+ game challenges within a frozen landscape that have been created with the snow-blanketed mountains, taiga or northern forest, tundra, polar ice pack combined with arctic cabins and a research station with its zero-carbon emissions. Biodiversity with moving polar wildlife polar bears, king penguins, reindeers, walrus, orca whales and sea eagles. Inside a realistic polarscape, there are moving vehicles, creating a living environment with arctic explorers, diggers, helicopters, ships, hovercraft and planes. Whilst the frozen eco-friendly seascape has been created that features glaciers, sea ice, icebergs, ocean, ice melt and shoreline. The polar environments could inspire the next generation of environmentalists to join pressure groups such as Greenpeace, who are against pollution, global warming, drilling exploratory wells and seismic mapping by both oil and gas companies. As fragile north pole recedes 13% every decade, the taiga northern forest covering 17° of earths surface has many recent fires, speeding up global warming and rising sea levels
