

INSTALLED IN STANDARD CEILING HEIGHTS THE LITE & PRO EDITION SIMULATORS, IDEAL FOR COMMERCIAL AND RESIDENTIAL

Where space needs to be maximised to increase the return on investment, whether in Sports Stores, Family Entertainment Centers, Sports Bars etc. Kicking-only simulators can be installed in rooms as low as 2.35m / 7'10" ensuring all customers can enjoy the world's most popular sport Football. When width is at a minimum the Lite Edition Simulator should be chosen which is ideal for entertainment and retailing, whilst in an ideal world for training, enhanced accuracy and golf the Pro Edition should be chosen. Both models are easy to install with just usb3 super speed camera(s), computer, projector and infrared lighting, perfect for commercial fitters such as audiovisual and entertainment companies to market and install to the largest number of customers ever. Sports Simulators are custom-made to the client's own room, determined by dimensions, cosmetics and the 60+ sports to be played from the 3,500+ sporting venues and 1,500+ game challenges. Simulator requirements used to be focused on golf, however, in recent years this has changed dramatically with even different versions of golf playable such as disc golf, foot golf, contest golf, mini golf as well as GSX Golf being played by all age groups and both sexes. However the most popular Sport played on Simulators, is also the world's most popular sport Football, there are 70 game challenges released and another 30 in development; shortly all clients will have 100 football challenges playable at no extra cost, simply download. To fully entertain football fans every major football team stadium worldwide can be engaged, with Match Play, Champions Play, Contest Play and Multi-Play tournaments being the most enjoyed.
