

SPORTS SIMULATOR UNVEILS MINI GOLF 2025: THE ULTIMATE UPGRADE FOR INDOOR ENTERTAINMENT

Welcome to Mini Golf 2025, the next evolution in indoor entertainment from Sports Simulator! Building on over three decades of innovation, we're excited to introduce our redesigned Mini Golf Simulator, enhanced with the latest Sports Simulator software engine for superior graphics and an unparalleled user experience. This update is available free for existing Sports Simulator customers through our regular software updates, while new customers can easily integrate the Mini Golf Simulator with our advanced detection technology into any existing housing or simulator bay setup. Designed to occupy under 8 square meters, our compact simulator features 18 Parkland holes and a thrilling hole-in-one challenge, perfect for maximizing space and boosting foot traffic in entertainment venues. The Mini Golf 2025 update brings a wealth of exciting features, including customizable tournaments and seven versatile leaderboards that support both local and networked competitions, enabling large-scale tournaments and fostering a competitive community. Additionally, the Glow/Night Mode will further transform the mini golf experience with vibrant, dynamic lighting for magical evening play. Players will be able to explore a diverse range of environments and themes, currently available for other Sports, such as iconic cities like London, Dubai, New York, Paris, Riyadh, and Las Vegas, as well as unique habitats like Mars, the Moon, Polar regions, Deserts, Forests, and Ranges. Seasonal themes include Christmas, Easter, Halloween, and Jurassic adding variety and excitement throughout the year. As indoor entertainment continues to rise in popularity due to global warming, our space-efficient Mini Golf Simulator ensures higher profitability and continuous customer engagement with its engaging gameplay and numerous leaderboard options. Seamlessly integrate our software and technology into any branded housing and stay tuned for innovative environments and challenges coming in 2025. Click to View the Sports Simulator Blog.
