

## TRANSFORM YOUR THEME PARK EXPERIENCE WITH SPORTS SIMULATORS FOR ALL WEATHER CONDITIONS

Transform your theme park experience with Sports Simulators, a solution designed to keep guests entertained and engaged regardless of weather conditions. In regions like Saudi Arabia and Dubai, extreme heat often makes outdoor activities uncomfortable and unsafe. By integrating Sports Simulators, theme parks can offer visitors a respite from the heat while still providing thrilling, interactive experiences. Similarly, for parks in areas prone to sudden rainstorms, robust indoor attractions ensure visitors have alternative options, keeping their spirits high and their tickets worth every penny. Sports Simulators are more than just an indoor activity; they offer a gateway to over 60+ interactive sports experiences, appealing to all ages and skill levels. Visitors can challenge themselves, compete with friends, and participate in park-wide tournaments, creating a dynamic and engaging environment. One standout feature is the ability to customise the software to reflect the park's branding, enhancing the immersive experience and reinforcing brand identity. Additionally, promotional screens can display ads for park amenities like food offers, discounts, competitions, and prize draws, seamlessly integrating entertainment and marketing to maximise visitor engagement and spending. As climate change leads to more unpredictable and extreme weather, investing in indoor attractions like Sports Simulators ensures your park remains a top choice for visitors.
