

## LATEST 2021 RACING SIMULATOR IS NOW RELEASED IN SURROUND AND SINGLE UHD PROJECTION SIMULATOR

Sports Simulator are proud to announce the early release of the 2021 unique 270° surround racing simulator, with enhancements requested by clients fully integrated. Ensuring that the Racing Simulator continues to lead the entertainment industry, as far as realism and accuracy are concerned. Latest enhancements include 200+ race and road cars to choose from including the biggest and most luxurious brands, competing on over 120+ spectacular track layouts from around the world. Graphical upgrades include a new user-friendly interface, 3d high definition grass textures, location textures, lighting improvements, customised car liveries and extended vibrant colours. Dynamic weather conditions now changing throughout the time of year and dependent upon the track location. Career mode settings allowing drivers to commence from novice and improving their performance skills all the way, up to the racing legend. Enhanced gaming feel from authentic vehicle modifications, sense of speed, through to intense crash effects. Including online multiplayer challenges with community events, competing in daily, weekly and monthly tournaments. Challenges include pace setter, breakout, scheduled events and official races, ensuring drivers are fully engaged with other drivers online from around the world, whilst being fully entertained. The perfect revenue stream for any family entertainment center or indoor commercial business.
