TECHNOLOGY

3D CAMERA DETECTION SYSTEM USB3

2 x Super Speed Cameras working simultaneously at separate 90 degree angles, creating world's most accurate indoor 3D Ball Flight Model. Low Voltage high quality cmos sensors, capture 1,000 frames per second. Tracking moving objects very accurately, measuring 50 separate positions, from launch strike point for 3m of ball flight.

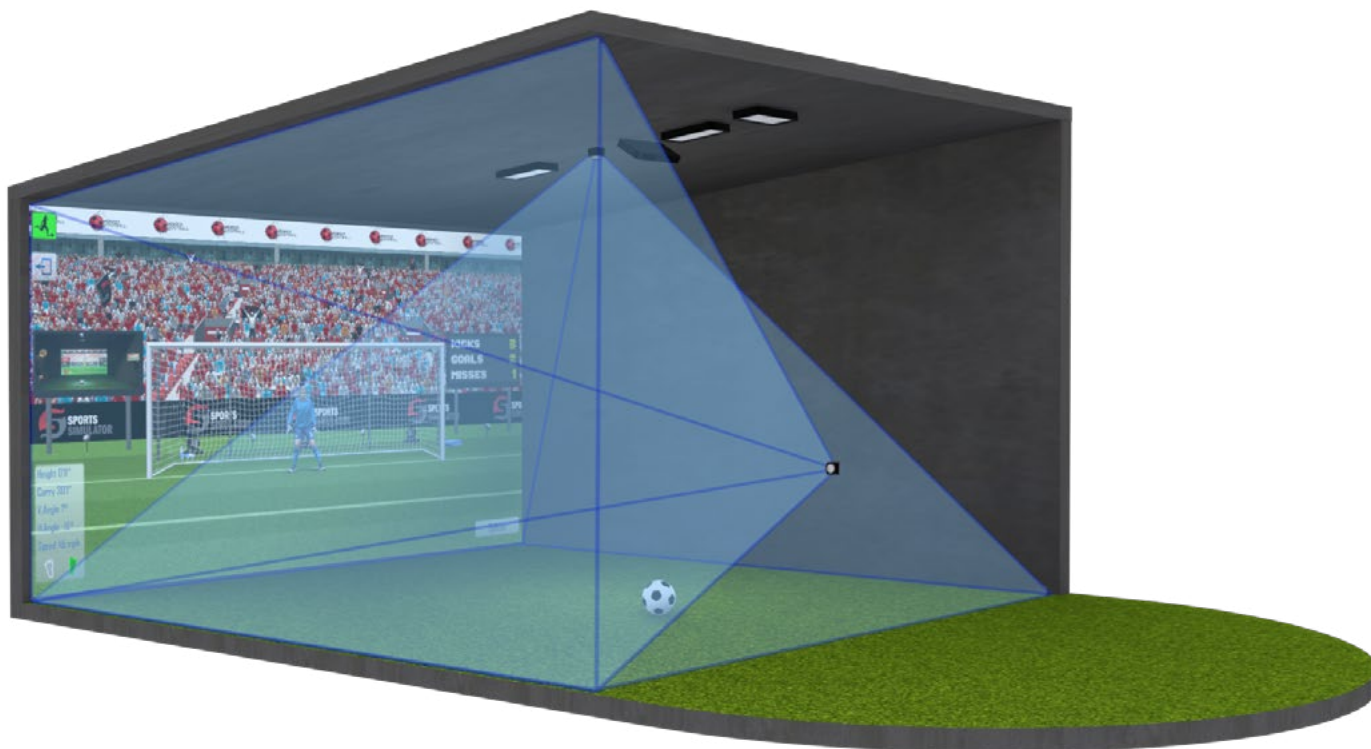

INFRARED LIGHTING

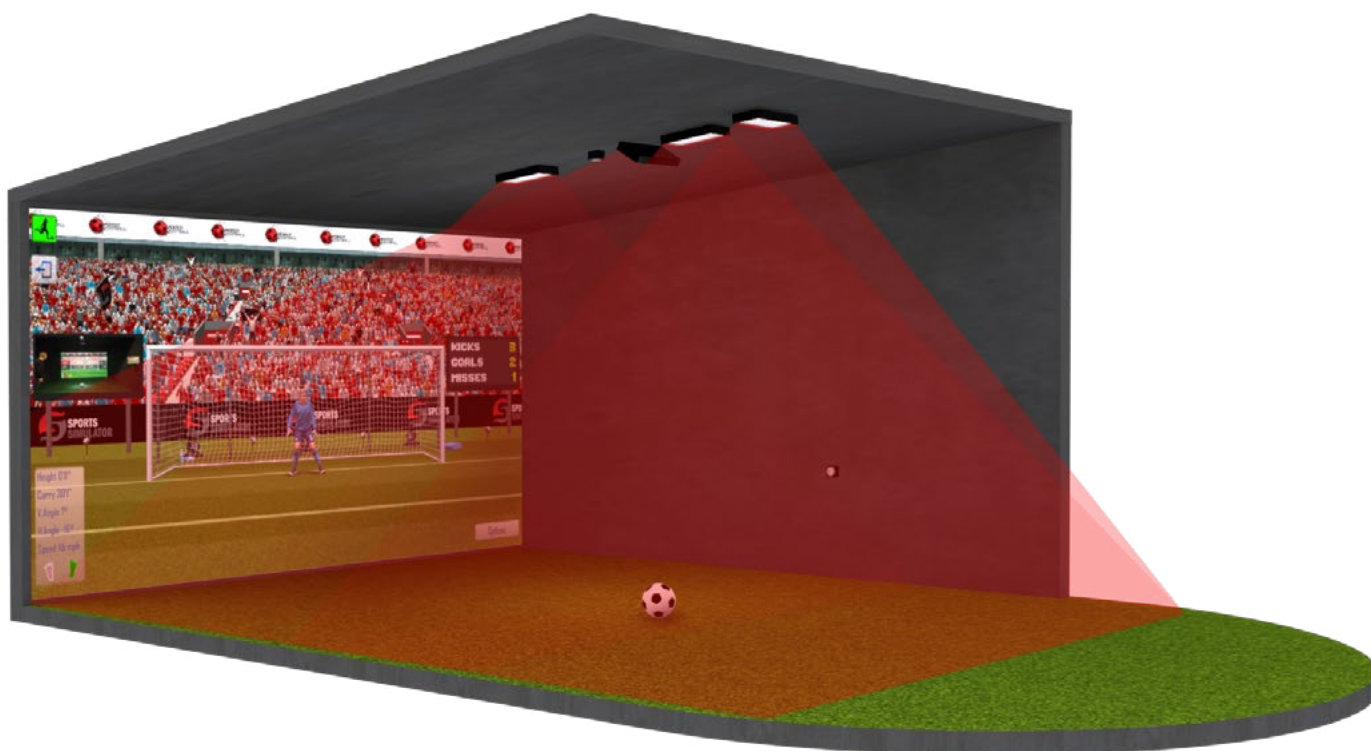

Our infrared light system offers low maintenance with lifespan of 50,000+ hours. Delivering powerful 850nm spectrum from 60 LED lights with a beam angle of 60°, ensuring that the complete detection area from the player to the screen is met. Our 3D Detection System measures the moving objects and the player.
