

OFFERS A WIDE RANGE OF GAME CHALLENGES, FOR PLAYERS FOCUSING ON HUNTING, SPORTING, TARGETS AND FUN GAMES

The Shooting Simulator is supplied with pistols or rifles, enabling players to enjoy twelve separate game challenges that vary between hunting, sporting, targets and fun game modes. The hunting challenges offered are Bird Hunt, Boar Hunt, Deer Hunt and Hare Hunt; there is a wide variety of wildlife integrated. Bird Hunt, for instance, commences on a grassed common with a field of wild pheasants and the gun dog for company; the virtual birds are chased into the sky. After walking through the field the player stops beside a river, where there are dozens of wild ducks flying above, offering another overhead shooting challenge. When the last duck has flown across the player automatically enters a rubber dinghy, at which stage the dinghy travels downriver, when suddenly geese commence flying across offering the third and final shooting opportunity. All the time the players score is being shown, so it is very easy to organise popular in-house competitions like most of the game challenges. There are some exciting challenges that offer two players contests, with both scores appearing on-screen together ensuring two team competitions are fully playable. Sporting Clays is ideal for professional player practise, whilst the two target challenges are ideal for novices. The entire family of varying ages can be entertained with a variety of fun challenges from holograms, piranhas, skull island and zombies created. Shooting Simulator is often incorporated with others such as Sports, Golf, Racing and Flight, making the simulator popular all year round.
