

ADVENTURE GOLF ADVANCED GRAPHICS DRIVING PROFITABILITY FOR ALL ENTERTAINMENT ATTRACTIONS WORLDWIDE

Sports Simulator has developed Adventure Golf, an innovative solution built on its highly precise simulation technology. This offering was created in response to valuable feedback from a variety of venues, including family entertainment centres, cruise ships, amusement parks, hotels, attraction venues, leisure facilities, golf resorts, and residential properties. The development was driven by the need for businesses to retain players through repeat visits. Traditional miniature golf courses often fail to attract returning players due to their fixed layouts. Adventure Golf addresses this challenge with fully interchangeable courses and environments, providing a fresh and engaging experience with every visit. This approach encourages repeat business and enhances profitability for venue operators. Beyond miniature golf, the simulator incorporates over 60+ sports, with 1,500+ game challenges and 3,500+ sporting venues from around the globe, broadening its appeal and creating diverse opportunities for success. Weather conditions, often a significant issue for outdoor venues, are also accounted for with Adventure Golf Simulators. Designed to fit into compact spaces – measuring just 10' (3m) wide x 10' (3m) deep x 8' (2.4m) high – they are ideal for standard-sized rooms. Outdoor venues can add cost-effective enclosures, while indoor venues can rearrange existing entertainment spaces to accommodate the simulator, maximising turnover with minimal adjustments. Adventure Golf is setting a new benchmark in entertainment, offering businesses a dynamic, engaging, and profitable way to attract and retain customers. Click to View the Sports Simulator Blog.
