TURN CASUAL GAMEPLAY INTO PROFITABLE COMPETITIONS WITH REAL-MONEY CONTESTS, BOOSTING ENGAGEMENT AND REVENUE

At Sports Simulator, we are revolutionising competitive socialising with Financial Rewards, an innovative platform that transforms casual gameplay into real-money competitions, offering entertainment venues a unique way to increase customer engagement and maximise profits. Seamlessly integrated with our existing Sport Leaderboards, this feature enables players to bet on their own performance, compete in public and private cash leagues, and enjoy an enhanced competitive experience. Upon arrival, players can scan a QR code for quick and secure registration, set their wager between £5 and £100, and compete to achieve the highest score, with instant payouts automatically processed via the app. Financial Rewards drives new footfall as players share their gaming experiences through social media, WhatsApp, and email, encouraging others to join the action. This increases engagement, boosts in-venue spend as winners reinvest their prize money in merchandise, food, and drinks, and unlocks new revenue streams by converting passive audiences into active participants in regular cash leagues. This trusted and compliant system ensures secure payments and responsible gaming. Additionally, Financial Rewards connects to Contest Football, the ultimate competition platform for football fans, maximising exposure for our partners' products and services across 70+ football game challenges, with plans to expand to all major sports in the future.

This groundbreaking technology redefines interactive gaming, offering venues an exciting opportunity to boost profits and customer engagement. Don't miss out on being at the forefront of competitive socialising—get in touch today to learn more! Click to View the Sports Simulator Blog.
