

## MOST SPORTS ARE PLAYABLE WITHIN AN INSPIRED CHRISTMAS SCENE FEATURING SANTA CLAUS & MERRY XMAS FRIENDS

Sports Simulator have created the perfect Christmas Activation, that runs directly after Halloween, ensuring that all commercial facilities are extremely busy from Autumn onwards. To introduce over forty sports to non-players from children through to less active adults who need additional exercise after lockdown, a very realistic Xmas 360° snowy winter scene has been developed which features an icy mountain, forest, igloo, sunset, and ice ring. Recognisable Christmas tunes are also featured alongside a vast array of animations including Santa's flying sleigh, falling golden stars, snowy owls, reindeer, penguins, polar bears, snowmen, a steam train, lights, people, and Father Christmas. A traditional market has also been created with stalls, a chocolate village, Santa's grotto, Christmas trees, presents, candy cane, stockings, funfair rides, a Ferris wheel, roller coaster, Merry-Go-Round, bumper cars, and a water flume. The attention to detail is incredible and offers hundreds of game challenges that can be played on the ice ring within this amazing scene. Commercial establishments like sports bars, family entertainment centres, shopping malls, cinemas, leisure centres and sports clubs can capitalise on traditional festive scenes to ensure that they are busy year-round. In addition, sponsors can also promote their product or service within the game challenges on offer by utilising the in-game rotating advertising banners. The Sports Simulator development team are currently creating Easter and Chinese New Year scenes so that family entertainment can be maximised all year round, and therefore translate into a steady and profitable income.
